## ABOUT ME

As a graduate of Politeknik Pos Indonesia, I started my career as a Full Stack Developer and have 1 year of experience working at PT. Vaganza Solusi Internasional and 2 years as a freelance developer. I have expertise in various technology fields such as web application development, network maintenance, and system administration. I also have experience as a Data Analyst at Badan Pusat Statistik Jawa Barat for 3 months, making me have a basic understanding of data analysis. Being involved in technology is my passion and I always strive to continuously improve my skills. I have the ability to adapt easily and work well with a team, making me capable of working efficiently in a dynamic work environment. With my experience and skills, I am ready to assist the company in achieving its goals and solving any technology problems they face.

---
